

If you liked FullAuthority® . . .

You will **LOVE** Best Authority

Now Recommended by LexisNexis®

Best Authority Light Edition

Light Edition is designed for smaller practices. It is more economical and requires less training.

Best Authority Premium Edition

Premium Edition is designed for larger organizations. It includes advanced features, network administration and configuration, and offers a volume discount.

LexisNexis and Levit & James have formed an alliance to promote and sell Best Authority, the leading product to generate a Table of Authorities (TOA). Best Authority is now the choice of 30% of the 250 largest law firms.

Best Authority does everything FullAuthority did well. In addition, it solves all of the FullAuthority® program's longstanding problems. Finally, it adds a remarkable set of new features. With Best Authority, your TOA will be more accurate, automatically formatted the way you want, and finished four to eight times faster.

FullAuthority® Benefits

- It would scan and automatically find citations in the brief.
- It offered many pre-set TOA formatting options.
- It would create a TOA, but it was placed in a different document.

FullAuthority® Differences

- There were no features to help you proof the TOA against the citations in the document. This most important step could take hours.
- If attorneys revised a document and you needed to re-run the TOA, you would have to redo all of your TOA edits and formatting.
- Product updates were infrequent.

New with Best Authority

- Convenient split-screen review of the brief for line-by-line proofing and editing.
- All citations highlighted in yellow or blue for correctly formatted citations, and pink for suspected errors.
- TOA is automatically formatted and created within the brief, and is placed exactly where you want it.
- Correct page numbers—100% of the time.
- Two editions: Best Authority Light and Premium.
- Best Authority Premium preserves your TOA edits when you re-run a brief.
- Compatible with Vista and Office 2007.
