

## **LexisNexis Introduces Concordance 10 with Unicode Support and Native File Viewer**

June 2, 2009 - LexisNexis today announced the release of Concordance 10, a new version of the industry-leading litigation document management software, featuring complete Unicode support that allows legal professionals to quickly search, review and produce documents in complex foreign languages.

Individuals who work on international litigation issues – which invariably involves documents that are written in various foreign languages – will be interested in learning more about how this type of litigation support technology can help them in today's increasingly international litigation environment.

Concordance previously supported documents in various European languages, but the new Unicode search capability extends support to languages that use the most complex characters in the world to easily work with documents written in Russian, Chinese, Korean, Hebrew, Japanese and Arabic. The new version also allows users to conduct mixed language searches within documents for increased accuracy and efficiency.

In addition to full Unicode support, Concordance 10 also provides legal professionals with valuable new tools, including:

- *A native file viewer* from partner Electronic Legal, which interfaces with Concordance
- *A new tag database* that provides full tagging support and stability
- *Increased security* features across the platform

According to industry market research, 92% of the top 200 law firms in the U.S. and more than 70,000 litigation professionals around the world rely on Concordance for assistance in managing the immense amount of paperwork generated in a case. Concordance is one offering within a complete lineup of litigation software and solutions from LexisNexis that deliver control, choice and cost-effective options to attorneys and other legal professionals.

For more information about how litigation teams can better support international litigation involving documents in complex foreign languages, or if you are interested in hearing more about the new tools in Concordance 10, please contact a LexisNexis Discovery Services specialist at (800) 421-TEXT (8398).
