

Hosted FYI™

To control costs, minimize risk and maximize internal resources, litigation teams need a reliable, cost-effective and experienced partner to host their data.

LexisNexis® Hosted FYI™ delivers comprehensive data management know-how online review and disaster recovery for law firms, corporations and government agencies. Utilizing the award-winning Concordance™ FYI™ software, LexisNexis® offers a secure, centralized, multi-user solution for processing, storing, retrieving, analyzing, reviewing, redacting and sharing discovery documents and other data quickly and easily.

Benefits of Hosted FYI

■ Outsource Risks and Technology Burden:

- Reduce internal administration and infrastructure costs
- Employ fail-safe, disaster recovery technology
- Freedom to focus on case strategy

■ Improved Financial Control:

- Greater cost recovery
- Only charged for what you use (users, documents hosted, etc.)
- Simplified billing (you receive 1 bill)

■ Neutral Third Party:

- Trusted environment for collaboration
- Highly secure user log-in and public/private folders ensures exclusive access

■ Proven Review Platform:

- Hosted FYI utilizes the Concordance backend, employed by the largest cases litigated today
- Industry standard, award-winning interface reduces review time

Exceptional Discovery Services

Hosted FYI boasts a vast technology infrastructure and is staffed by network engineers, database administrators, software developers and litigation support professionals. The combined strength of our award-winning online software and expert services helps you control risk more easily, reduce litigation costs and efficiently manage your discovery teams.

Robust Security

Hosted FYI employs leading perimeter and backend network security, firewall and intrusion detection systems, maintains ultra high-speed Internet connections, co-location facilities and terabytes of scalable disk storage. We also employ the finest data mirroring and failover technology, as well as multiple layers of physical security.

Skilled Project Management and Product Support

When you need assistance, our expert project managers and tech support are there to help. Our project support team works with you throughout the life of the case. Every case receives a project manager and database administrator, regardless of case size.

Reliable Data Management

Our team is dedicated to protecting the integrity of your discovery data. All documents are tracked through the Hosted FYI chain of custody process. Our procedures and protocols exceed the most rigorous standards.

Effective Disaster Recovery

In the event of a major disaster, your team can be up and running again quickly with immediate access to your crucial litigation documents. With Hosted FYI, you can be confident that your data is always there and always secure.

Excellent Data Capacity and Processing

The Hosted FYI data processing systems can quickly and securely convert thousands of documents every hour. We have the systems and expertise to meet your needs, including the ability to accommodate hundreds of concurrent users per case.

Product of the Year in 2005

HOSTED FYI Secure Central Server

COLLABORATE ON DISCOVERY MATTERS SECURELY AND IN REAL TIME WITH HOSTED FYI, whether you're at the main office, an attorney on the road, co-counsel in a satellite office, or an expert witness in a remote location.

Secure, Easy-to-use Web-based Review

In today's rapidly changing litigation environment, success depends on the speed at which you can access and organize key discovery information. Law firms, corporations and government agencies that can extend the reach of their discovery to reviewers wherever, whenever and however they are needed, gain a strategic advantage.

Excellent Data Capacity and Processing

The Hosted FYI data processing systems can quickly and securely convert thousands of documents every hour. We have the systems and expertise to meet your needs, including the ability to accommodate hundreds of concurrent users per case.

Comprehensive Image Viewing

Easy-to-use Web-based TIFF image viewing comes standard in FYI. It automatically displays images side by side and in perfect sync with the document text. A robust set of tools allows you to flag important information, redact confidential sections, insert customized redaction stamping (e.g., attorney/client privilege) and then search your redlines by author or type (e.g., redactions, notes, etc). You can even print batches of documents locally in your office easily and without delay.

Streamlined E-Discovery Review

Organize, search and retrieve e-mails, native attachments and electronic documents quickly and accurately. All e-discovery processed in FYI keeps its original metadata and rich-text formatting (fonts, bullets, underlining) ensuring no stone is left unturned.

Flexible Reporting

Produce perfectly formatted customized reports for fact review and trial preparation. Select from numerous pre-defined reports including witness kits, case chronology, privilege logs, Q&A sets, annotations, production history reports and more. Advanced report writing is also available for unique reporting needs.

State-of-the-Art Security

Robust user security ensures that your confidential information stays protected. Access to your secure data can be restricted by user, database or field and includes advanced LDAP protection to authenticate logins. FYI also boasts True SSL encryption and 128-bit single use, private key encryption delivers high speed session level security.

The Discovery Experts: Data Hosting

LexisNexis Discovery Services has the right consulting and technology choice for every discovery matter. Top law firms, corporations and government agencies rely on the LexisNexis products and services, Applied Discovery[®], Concordance, and Hosted FYI, to meet their discovery obligations on time, accurately and cost-effectively. Services include records and information management consulting, data filtering, data processing, online review and document production in the format that each matter requires. Hosted FYI employs award-winning technology and expert project management for clients to securely outsource, access, analyze and share discovery information online.
