Shepard's® Citations Service on LexisNexis® at www.lexis.com guides you to the best information—faster, easier and more reliably than other online services. *Shepard's* is your early warning system, alerting you to vital changes in the authorities you use as foundations for your work and leading you to newer, stronger cases to enhance your position. See for yourself.

You Need:	<i>Shepard's</i> Citations Service on LexisNexis at www.lexis.com	KeyCite	Your <i>Shepard's</i> Payoff:
Total history and treatment analysis, so you'll reach sound conclusions.	<p><i>Shepard's</i> expert attorney-editors provide the full spectrum of history and treatment analysis, including "followed" treatment and "questioned by."</p> <p><i>Shepard's</i> includes extensive analysis for cases, statutes, regulations, patents and other primary law sources.</p>	<p>No "followed" in KeyCite. "Positive" in KeyCite means no negative treatment.</p> <p>KeyCite editors who check for headnote and topic assignments also determine history and treatment codes.</p>	<p>With <i>Shepard's</i>, you'll know at a glance if your authority has been weakened or strengthened. You'll also quickly spot potential splits of authority. One case may stand for multiple issues, only one of which is overruled, while the others may be expressly followed. Or, just one jurisdiction may overrule a case while others may expressly follow it.</p> <p>Backed by a team of citation experts, you can be sure your authority will stand up to adversarial and judicial scrutiny.</p>
The faster, easier way to find authorities relevant to your research.	<p>One screen; one step; get results. <i>Shepard's</i> Summary provides key references, editorial treatment and information on LexisNexis® headnotes from your case that match text in the report's citing cases. Navigation tools allow you to go quickly to the parts of the report of most interest to you.</p> <p><i>Shepard's</i> is organized by jurisdiction and court, so it's easy to spot citations relevant to your research.</p> <p>The FOCUS™ Restrict By link lets you add custom restrictions by treatment, jurisdiction, date or LexisNexis headnote, or add focus terms.</p>	<p>Sorry, you can't limit by treatment type in KeyCite. And limiting by jurisdictions means more screens, more steps.</p> <p>KeyCite does not organize its answer sets by jurisdiction, making it hard to identify citations from your court.</p>	<p>Choose <i>Shepard's</i> and know in seconds. Quickly and easily narrow a long list of citing references to citations relevant to your research.</p>
The most current citations available, so you don't miss anything.	<p>Only <i>Shepard's</i> adds all history and treatment in a single step, typically within 24 – 48 hours.</p>	<p>Only the obvious analysis is added right away. More subtle analysis may take days—even weeks.</p>	<p>With <i>Shepard's</i>, you'll know quickly when a subsequent decision affects your authority in any way. No surprises.</p>

You Need:	<i>Shepard's Citations Service</i> on LexisNexis at www.lexis.com	KeyCite	Your <i>Shepard's</i> Payoff:
Additional authority to bolster your arguments—quickly.	<i>Shepard's</i> “followed” leads you directly to decisions that have followed your case. There are also references to secondary sources, such as Matthew Bender® treatises and law reviews that provide you additional authorities. In addition, <i>Shepard's</i> Table of Authorities also includes following cases, treatises and law reviews. Start with one on-point case and move quickly to more recent decisions that may provide stronger support for your position.	Not possible. The best you can do is browse through every non-negative citing case.	With <i>Shepard's</i> , it's faster and easier to find additional authority for your arguments.
Assurance that your case stands on a firm foundation.	Are the authorities on which your case relies still good law? <i>Shepard's</i> Table of Authorities is the fastest way to find out. <i>Shepard's</i> TOA tells you which cases your case followed and which it differs from.	KeyCite Table of Authorities does not offer detailed analysis codes or “following” analysis, so you can't check the foundation of your case in a single step.	Uncover hidden weaknesses with <i>Shepard's</i> Table of Authorities.
On-point cases dealing with your specific point of law.	<p>Link on a LexisNexis® headnote in <i>Shepard's</i> and move directly to the language in the citing case where the point of law in your headnote is discussed. Relevant words of the headnote are bolded for easy identification.</p> <p>There are multiple access points to the full text of cases within <i>Shepard's</i>. LexisNexis headnote links take you right to the discussion in the citing case of the issue identified in the case—the part of the case of interest to you.</p> <p>You'll only see a “restrict by headnote” link if a subsequent case has actually discussed that point of law. And the links are in the report itself complete with easy access to the full text of the headnotes.</p>	<p>Headnote numbers in KeyCite are not active hyperlinks. KeyCite links to the first place your case is cited, which may or may not be the part of the case you need. Words matching your headnote are not bolded, making it harder to spot relevant language.</p> <p>Headnote analysis is limited primarily to West reporters. West editors write headnotes for relatively few unpublished decisions.</p> <p>West puts the KeyCite Notes link on every headnote, and you get an error report if there are no citing cases that match your headnote. KeyCite's Limit feature requires multiple steps.</p>	With <i>Shepard's</i> , you'll get quicker access and more on-point references for the point of law you've selected.
