

FYI 2.0 Voted 2005 Product of the Year

New Web Product Receives Top Honor from Readers of Law Technology News

Los Angeles, February 6, 2006— Dataflight Software, Inc., a global leader in litigation support software, today announced its FYI 2.0 client/server software was named "Product of the Year" at the prestigious Law Technology News Technology Awards. The annual Awards recognize leaders in the legal field—from software vendors to law firms—for product innovation and implementation.

"With the hundreds of new legal software products released this past year, we are thrilled that the readers of Law Technology News have recognized FYI 2.0 as the industry's best," said Jeff Lipsman, President, Dataflight Software, Inc. "We put a great deal of energy, along with our users' top requests, into designing FYI 2.0 — Concordance on the web. It's especially gratifying that it has been so widely embraced in such a short period."

Released in October 2005, FYI 2.0 includes both the FYI Core Server™ and FYI Reviewer™ which work in unison to bring satellite offices, co-counsel, expert witnesses and clients together to access Concordance databases from anywhere. With the explosion of paper and electronic discovery, litigation teams require a secure, fast, and efficient way to organize, search, and produce discovery documents. FYI 2.0 is an unprecedented, powerfully integrated client/server software that extends the litigation management functionality of Concordance® and Opticon™ beyond the desktop and onto the web.

"The role of technology continues to grow in virtually every area of the practice and business of law, from the courtroom to the back office. The winners of our third annual awards program, selected by readers who use and rely on these technology products and services, are leading the industry. We congratulate them on this significant achievement," said Kevin Vermeulen, publisher of Law Technology News.

About the Law Technology News Company/Product Awards

In 2005, the editors of Law Technology News asked the publication's more than 40,000 subscribers to select products and vendors that represented outstanding achievement in legal technology in 11 award categories. Ballots were solicited from LTN's subscriber audience of law firm partners and managing partners, legal administrators, MIS/IT directors and specialists, corporate counsel, litigation support specialists, librarians and other legal professionals. Winners were determined based on the most-mentioned product/company in each category. Information on the awards and winners will be featured in the March issue of Law Technology News and on the magazine's Web site at www.lawtechnologynews.com.

About Law Technology News

Law Technology News provides timely information and insight into the latest technologies, products and services available for the legal marketplace. Each month, the award-winning magazine features new product announcements, as well as monthly articles and columns written by industry experts and senior law firm decision makers. LTN is distributed to more than 40,000 selected subscribers and is also available on the Web at www.lawtechnologynews.com. The magazine is published by ALM.
